

Starley Flynn

801-690-0607 | starleyflynn@gmail.com | Port Ludlow, WA

Professional Summary

Senior Engineer | Creative Technologist | Interaction Architect

Senior Engineer with 10+ years of experience architecting high-fidelity, accessible interfaces for complex data ecosystems. Expert in **Human-Computer Interaction (HCI)**, leveraging a **Bachelor of Fine Arts** background to treat software as a performance—focusing on narrative flow and seamless state management. Specialized in building **accessible design systems** (WCAG 2.2) and bridging the gap between sophisticated backend logic and user-centric frontend performance.

Technical Skills

- **Frontend:** React, JavaScript (ES6+), TypeScript, LWC, Design Systems, CSS Variable Architecture.
 - **Backend & Data:** Java (Spring/Apex), GraphQL, OpenAPI, Python, Event-Driven Architecture.
 - **Tools & Infrastructure:** Bazel Monorepo, Jest, Salesforce DX, Git, SLDS.
 - **Specializations:** WCAG 2.2 Compliance, Technical Design Documents (TDD), ARIA-Live, Focus Management.
-

Professional Experience

Salesforce | Senior Member of Technical Staff (SMTS) | August 2021 – Present

- **UX Engineering Leadership:** Lead accessibility initiatives for high-traffic Education Cloud enrollment flows, implementing ARIA live regions and focus management to exceed WCAG standards.
- **Technical Design & Architecture:** Author comprehensive TDDs for complex course search and attendance systems, utilizing a **Connect API strategy** to balance performance with design parity.
- **Product Execution:** Architected a GraphQL-backed course search and cart system, streamlining the "Search → Cart → Registration" pathway for 100k+ users.
- **Full-Stack Optimization:** Developed Java services and OpenAPI surfaces within a **Bazel monorepo**, managing complex dependencies and refining hierarchical completion logic.

- **AI Innovation:** Integrated AI-assisted development including Claude Code and Cursor to reduce design-to-production latency for student-facing applications.

Google | Salesforce Application Engineer | June 2020 – August 2021

- **Interaction Design:** Engineered foundational lead rules engines and sophisticated **Lightning Web Components (LWC)** for Google Cloud Marketing.
- **Cross-Functional Collaboration:** Partnered with global development teams to deliver high-velocity, scalable solutions, consistently earning "Exceeds Expectations" ratings.

Western Governors University | Salesforce Architect - Senior Engineer | May 2017 – June 2020

- **Systems Architecture:** Defined enterprise-wide integration patterns and led the development of an **event-driven change management system** for student enrollment.
- **Modular Design:** Utilized Salesforce DX Unlocked Packages to establish scalable, organization-wide development standards.

TAB Bank | Salesforce Developer & Business Analyst | August 2013 – May 2017

- **Engineered end-to-end Salesforce solutions** by integrating cross-platform applications and deploying custom Apex/Flow tools while managing enterprise-level user support and security.

Key Projects & Community Leadership

- **The Designed Stage:** Developed a theater-themed Design System and seating chart algorithm using React, focusing on **semantic tokens** (e.g., "Coastal Misty") and system-wide re-skinning.
- **RAD Women Code Coach:** Mentoring and coaching women in professional coding communities since 2016.
- **Public Speaking:** Frequent speaker at **Dreamforce** and **Snowforce** on technical architecture and design.

Education

- **Bachelor of Fine Arts (BFA)**, University of Utah
- **4X Trailhead Ranger**, Salesforce
